

# Window & Door

February 19, 2008

## International Builders' Show

### PLASTPRO

A new line of fiberglass entry doors from Plastpro Inc. feature built-in mini-blinds. The entry doors are available in a variety sizes and feature the manufacturer's advanced Hydroshield Technology. Sealed between tempered glass, the pre-installed mini-blinds can be tilted as well as raised completely up and down to provide as much or as little light and privacy as desired. The flush glazed design features door panels and window frames that are "flush," or not raised, above the door surface to provide a modern appeal and cleaner look. These new doors are available in paintable smooth skin or an oak grain finish that can be stained in the shade of your choice. Mini-blind doors, available in half or full lite, complement any home's design.
